

BILAWAL KHAN

IT Application Support Engineer | Project Management Professional

Karachi, Pakistan • +92 343 2512522 • bilawalkhanjandan@gmail.com • linkedin.com/in/engrbilawalkhanbilal

SUMMARY

Results-driven IT Application Support Engineer and Project Management professional with a proven track record across enterprise IT operations, mission-critical banking application support, and end-to-end technical project delivery. Combines hands-on expertise in tier-1 banking systems — including UNISON Application and Avaya Aura telephony architectures — with strong project execution skills: requirements engineering, Agile delivery, UAT coordination, and cross-functional stakeholder management.

TECHNICAL SKILLS

Languages & Web: SQL, Python, JavaScript, HTML, CSS, React.js, Vue.js

Systems & Platforms: UNISON Application, Avaya Aura (Communication Manager, WFM), SIP Telephony, Active Directory

Practices: Agile / Scrum, Requirements Engineering, UAT & Test Case Design, Defect & Change Management, Risk Management

Operating Systems: Windows, Linux

PROFESSIONAL EXPERIENCE

Senior IT Officer – Call Center IT Operations

Jan 2025 – Present

Bank Alfalah

Karachi, Pakistan

- Act as primary technical support and project point-of-contact for the UNISON Application and enterprise Avaya Aura suite (Communication Manager, WFM), coordinating fixes, upgrades, and rollouts across the banking call center infrastructure.
- Manage complex user account provisioning, Active Directory configurations, and secure access control policy implementations; delivered validation logic fixes (e.g., user ID case-sensitivity updates) end-to-end from scoping through deployment.
- Diagnose and troubleshoot complex middleware layers, configure SIP telephony hardware, and lead coordination with internal engineering teams and external vendors on system integration projects.
- Analyze telemetry logs and system performance data to safeguard infrastructure uptime; plan and execute platform QA testing cycles and produce compliance and audit reporting for internal IT governance.

Technical Support Executive

Mar 2023 – Dec 2024

ZRG International Pvt Ltd

Karachi, Pakistan

- Coordinated with corporate project teams to plan, deploy, configure, and manage enterprise SIP communication server rollouts, ensuring zero operational disruption during deployment phases.
- Administered Active Directory services, resolved identity verification issues, and delivered end-to-end desktop and application support for corporate clients.
- Owned test case design and defect tracking workflows for mission-critical communication software upgrades, validating releases prior to production deployment.

Frontend Developer

Nov 2021 – Aug 2022

The Designry Pvt Ltd

Karachi, Pakistan

- Built fluid, responsive, data-driven user interfaces using React.js, Vue.js, and JavaScript, ensuring cross-browser compatibility and optimized rendering performance.
- Partnered with project managers and design teams to translate product vision into high-quality, impactful code across multiple client projects, consistently meeting deadlines.

Front End Developer

Jul 2021 – Aug 2021

Aamanto Technologies Inc.

Karachi, Pakistan

- Developed and maintained front-end components for web applications, contributing to rapid prototyping and delivery under aggressive project timelines.

KEY PROJECTS

- Enterprise Platform Deployments & UAT — led UAT of foundational banking infrastructure, including RAAST Integration, Avaya Aura platforms, and Sestek Voice Biometrics.
- Application Validation Project — directed core validation fixes in user management workflows, resolving identity matching errors while ensuring full technical compliance.
